

SolarInvert Energy Solutions

Photovoltaic solar panels in Slovenia

Overview

What is the potential of photovoltaic energy in Slovenia?

Slovenia offers great potential for exploiting photovoltaic energy due to evenly spread solar irradiation. The first photovoltaic power plant in Slovenia was set up in 2001. At the end of 2017, 4,231 photovoltaic power plants had been installed in Slovenia with a total power of 267 MW.

How much will Slovenia spend on solar energy projects?

Data Protection Policy Slovenia has set aside €16 million (\$16.7 million) to support solar energy communities, requiring projects to include at least 100 kW of PV capacity, with or without storage. The program will run until 2027.

How much solar energy does Slovenia have in 2024?

In 2024, Slovenia installed a record 230 MW of new PV capacity, bringing the total installed capacity to 1.1 GW by the end of the year. This rapid expansion demonstrates the growing importance of solar energy in Slovenia's energy mix.

How many PV installations did Slovenia have in 2023?

Slovenia recorded 400 MW of new PV installations in 2023, taking its total installed capacity to 1.1 GW, according to the latest figures from the Ministry of the Environment, Climate and Energy. This content is protected by copyright and may not be reused.

How do I get a loan for a photovoltaic power plant?

In order to manage the construction and installation costs of the photovoltaic power plant, investors may apply for favourable loans or grants from the Eco Fund, the Slovenian Environmental Public Fund. Project loans for photovoltaic power plants are also available from commercial banks, usually under less favourable terms and conditions.
