# Poland chemical energy storage project subsidies

## Overview

---

Following a public consultation launched in July 2024, the Polish Ministry of Climate and Environment has finalized its energy storage subsidy program which aims to support the deployment of more than 5 GWh of energy storage in the country. What is Poland's energy storage subsidy program?

Following a public consultation launched in July 2024, the Polish Ministry of Climate and Environment has finalized its energy storage subsidy program which aims to support the deployment of more than 5 GWh of energy storage in the country. The new regulation was published in the Journal of Laws of the Republic of Poland on March 7.

When will the energy storage scheme be launched in Poland?

Call for applications under the Scheme “Energy storage facilities and related infrastructure for improving the stability of the Polish electricity grid” will be launched already this year. Subsidy contracts are to be entered into by the end of 2025, while the period for spending the funds ends with 2028.

How much PLN will be distributed under the energy subsidy scheme?

A total of PLN 4 billion (\$1 billion) will be distributed under the subsidy scheme by the end of 2025 in a bid to bring online more than 5 GWh of energy storage projects by 2028.

How much PLN is available for energy storage in Poland?

PLN 4 billion available. On 23 July 2024, the National Fund for Environmental Protection and Water Management put under public consultation a new priority aid scheme entitled: “Energy storage facilities and related infrastructure for improving the stability of the Polish electricity grid”.

What is Poland's energy storage program?

The program , “Electricity storage facilities and infrastructure for improving the stability of the Polish power grid,” is aimed at companies planning to

invest in energy storage facilities with a capacity of at least 2 MW and a minimum capacity of 4 MWh.

Why should Poland invest in energy storage?

Development of energy production and consumption forecasting systems. Energy storage subsidy programs support the transformation of Poland's electricity grid into a more flexible and resilient system. Investments in storage facilities enable better integration of RES, improve grid stability and enhance the country's energy security.
