

## SolarInvert Energy Solutions

# Poland makes double-glass panels

## Overview

---

Does opolglass provide heat-insulating glass panes?

Opolglass delivers double-glazed and triple-glazed heat-insulating glass panes. Due to the high absorption of solar radiation, glass used to make solar-control glass panes perfectly protects from excessive sunlight.

What factors affect the glass industry in Poland?

When exploring the glass industry in Poland, several key considerations come into play. The regulatory environment is crucial, as Poland adheres to European Union standards, which influence product quality, safety, and environmental practices.

What are the different types of glass panes & safety glass?

There are various types of glass panes and safety glass, including tempered glass, bullet-proof glass, protective glass preventing external influence, decorative glass panes and glass, and glass façades. Almost 15 years of experience in the industry has enabled us to adjust our offer specifically to customer needs.

What is a heat-insulating glass pane?

Heat-insulating glass panes are used in business premises, flats and detached houses where you want to maintain a certain temperature. Opolglass delivers double-glazed and triple-glazed heat-insulating glass panes.

What is a heat insulating glass pane?

Heat-insulating glass panes are made of glass with high heat-insulating performance whose function is to transmit light and solar energy inside rooms, preventing heat loss to the outside. Heat-insulating glass panes are used in business premises, flats and detached houses where you want to maintain a certain temperature.

What is a security glass pane?

Security glass panes replace bars in both public places and private flats. They are used in display windows, banks and other institutions that are at a particular risk of adverse activities of third parties. Glass of this type perfectly reduces noise in places that are to be insulated from outside sounds.
