Poland promotes new energy storage industry

Overview

Is energy storage a good investment in Poland?

In Poland, interest in energy storage investment has been evident for some time. Last year's main auction of the power market, with capacity delivery for 2029, further bumped up the capacity of storage projects.

Will Poland become a hotbed of energy storage project development?

Poland, Europe's tenth-largest economy, is set to become a hotbed of energy storage project development as the share of renewable energy on its grid soars. The country built out a record 1.2 GW of onshore wind power in 2023, according to industry body WindEurope, bringing its total installed capacity to around 9.4 GW.

What is Poland's energy storage subsidy?

Learn about Poland's €1 billion energy storage subsidy aimed at installing 5.4 GWh of BESS by 2028, strengthening grid stability and accelerating the green transition.

Is Poland a key player in Europe's energy storage sector?

Poland is emerging as a significant player in Europe's energy storage sector. The recent capacity market auctions in December 2024 highlighted a substantial shift towards BESS, with approximately 2.5 GW secured by new generation capacity market units, predominantly Li-ion energy storage projects.

Is the short-term outlook for energy storage in Poland good?

Whatever happens, it seems the short-term outlook for storage in Poland is good—and will only get better as the country moves to address European and national climate goals. Poland, Europe's tenth-largest economy, is set to become a hotbed of energy storage project development as the share of renewable energy on its grid soars.

What happened to energy storage in Poland?

The Energy Regulatory Office said in a report last year on electricity storage in Poland that, as a result of the main power market auctions for 2021-2028 and the supplementary auctions for 2012-2025, contracts for energy storage with a total capacity of 9.5 GW were concluded.
