

SolarInvert Energy Solutions

Polish energy storage power supply customization

Overview

How many GWh of energy storage capacity will Poland have by 2035?

In a bid to tackle the challenge of the growing electricity production from renewable energy sources, the Polish utility is looking to add more than 10 GWh of energy storage capacity by 2035. Its plans involve more than 80 projects, the value of which is estimated at around PLN 18 billion (\$4.7 billion).

Is Poland a key player in Europe's energy storage sector?

Poland is emerging as a significant player in Europe's energy storage sector. The recent capacity market auctions in December 2024 highlighted a substantial shift towards BESS, with approximately 2.5 GW secured by new generation capacity market units, predominantly Li-ion energy storage projects.

What is PGE's Energy Storage plan?

PGE Group has laid down ambitious plans for energy storage deployment over the next ten years. In a bid to tackle the challenge of the growing electricity production from renewable energy sources, the Polish utility is looking to add more than 10 GWh of energy storage capacity by 2035.

What is PGE Group's energy storage portfolio?

Today, PGE Group's energy storage fleet stands at nearly 7 GWh. It is comprised almost exclusively from pumped hydro storage facilities aside from three single-digit-megawatt battery energy storage systems. The planned investments will help diversify the utility's storage portfolio.
