

SolarInvert Energy Solutions

Polish off-grid energy storage battery solution

Overview

Why is Poland launching a grid-scale battery system?

The introduction of this storage support program marks a key milestone in Poland's energy transformation. By enabling the deployment of grid-scale battery systems, the country is strengthening its ability to integrate larger volumes of clean energy, reduce dependence on fossil fuels, and enhance power system stability.

How much money does Poland spend on battery energy storage?

Poland has finalized a comprehensive subsidy program aimed at accelerating the deployment of battery energy storage systems (BESS), with a total budget of PLN 4 billion (approximately €1 billion).

What is Poland's energy storage subsidy?

Learn about Poland's €1 billion energy storage subsidy aimed at installing 5.4 GWh of BESS by 2028, strengthening grid stability and accelerating the green transition.

Is PGE Polska Grupa Energetyczna building a battery energy storage system?

Polish utility PGE Polska Grupa Energetyczna (WSE:PGE) has signed a contract with the local unit of Korean battery major LG Energy Solution for the construction of the 262-MW/981-MWh Zarnowiec battery energy storage system (BESS). Energy storage battery. Photo by Anna Vasileva.

Where will LG Energy Solution supply lithium iron phosphate batteries?

It also noted that the project will be supplied with locally manufactured grid-scale lithium iron phosphate batteries at LG Energy Solution's production facility in Poland. LG Energy Solution will also be in charge of the project design and construction on a turnkey basis. Completion of construction is scheduled for 2027.
