Portugal energy storage battery procurement

Overview

Government outlines €400 million plan to strengthen grid resilience after April blackout. Portugal will launch a competitive tender for 750 MVA of battery energy storage before January 2026, as part of a broader €400 million package aimed at improving grid reliability and preventing future blackouts. Does Portugal support battery energy storage projects?

Portugal has awarded grant support to around 500MW of battery energy storage system (BESS) projects, using EU Recovery and Resilience Plan (RRP) funding, a bloc-wide scheme that has supported energy storage across the continent.

How many energy storage projects will Portugal support?

Portugal news » Energy storage competition will support 41 projects The tender, launched in the summer of 2024 to promote renewable energy storage and reduce reliance on fossil fuel sources, has just announced its final results, stated the Ministry of Environment and Energy in a communiqué.

How many energy storage projects were selected in Portugal's 2025 procurement?

A total of 43 projects were selected from 79 applications in Portugal's 2025 energy storage procurement. This included six projects from Spain's Iberdrola, which secured nearly €20 million (\$20.6 million) in public funding. From ESS News.

What does Portugal's energy storage tender mean for the energy transition?

Portugal's government has announced the outcome of an energy storage tender that will see the installation of 500 MW of energy storage capacity to support the country's energy transition. Energy storage battery. Photo by Anna Vasileva.

Which countries are moving forward with battery energy storage system procurements?

Portugal and Moldova have moved forward with battery energy storage system (BESS) procurements with funding from the EU and USAID.

How will a smart energy system contribute to Portugal's climate goals?

The planned investment will fully contribute to the Portuguese climate goals by enhancing intelligent energy systems and their storage. This initiative aims to increase the capacity and flexibility of the national public grid, optimising the electrical system to handle the expected rise in electricity consumption.
