

SolarInvert Energy Solutions

Portugal s BMS standard for household batteries

Overview

Are portable batteries regulated in Portugal?

Portable batteries producers in Portugal are required to register as such, while managing waste batteries through a collective or an individual system. SCIEX has joined batteries compliance scheme ERP Portugal to manage all aspects of batteries collection and recycling in Portugal.

How does a BMS communicate with a battery management system?

The BMS potentially communicates to a higher level battery management system. Pack: a pack consists of one or more modules and it has at least one current sensor. It has a BMS that reads this current sensor and potentially communicates with battery management systems at lower and higher levels.

What is a battery management system?

The job of the battery management system is to ensure that the battery is in the proper state of balance, the battery does not operate outside the ideal temperature, the battery current is not higher than the design, and maintains the ideal operating voltage range. IEC 61508 sets the standard for managing battery systems. IEC 61508 standard:.

What are battery safety standards?

Battery safety standards refer to regulations and specifications established to ensure the safe design, manufacturing, and use of batteries.

What are the requirements for a battery?

IEC 60086: International standard for the performance and safety requirements of primitive batteries. CE certification: Battery products that meet European battery standards need to obtain CE certification. REACH regulation: Chemical information is required to ensure the safety of battery materials.

What does the new battery regulation mean for the European Union?

The replacement of the former directive with the Regulation, applied since February 18, 2024, will enable a uniform application of the new requirements for batteries to all economic operators in the European Union, as Member States are not required to transpose the regulation into their respective internal legal systems.

Portugal s BMS standard for household batteries

Battery Compliance Portugal

The Batteries Directive 2006/66/EC was transposed through Decree-Law No. 6/2009. Portable batteries producers in Portugal are required to register as such, while managing waste ...
