Power 5G outdoor micro base station

Overview

What is a 5G small cell base station?

5G Small Cell indoor and outdoor 'all-in-one' radio access for private 5G wireless networks. 5G Small Cell Base Stations (Micro Cell, Femtocell) offer advanced features and “stand alone” capability for private networks.

How much power does a 5G base station use?

Each nation has a different 5G strategy. For 5G, China uses 3.5GHz as the frequency. Then, a 5G base station resembles a 4G system, but it's on a much larger scale. For sub-6GHz in 5G, let's say you have a macro base station. The power levels at the antenna range from 40 watts, 80 watts or 100 watts.

What is the range of a 5G base station?

5G base stations use millimeter waves that are extremely limited in range. Each 5G base station has a range of between 800–1000 feet, or 0.15–0.19 miles. It makes up for its limited range by surpassing 4G in other key areas: data transfer speeds (bandwidth), latency, and capacity.

What is x4000 5G SDR small cell outdoor base station?

X4000 5G SDR Small Cell Outdoor base stations enjoy great flexibility, high performance as well as very low cost of operation and ownership. "Stand Alone" operation is possible which enables the 5G Base station to connect remote terminals without need for external network elements.

What is a 5G small cell gnodeb base station?

5G Small Cell gNodeB base stations from CableFree, part of the Emerald range of Base Station and core EPC products featuring advanced cellular technology. All of the the CableFree range of Small Cell products feature latest generation technology and upgradable features for future-proof networking and performance.

Does CableFree offer a 5Ghz base station?

CableFree offers Band 46 5GHz LTE Base Station and Outdoor CPE devices for 4G/LTE operation in Unlicensed 5GHz spectrum, enabling smaller operators and private customers to build LTE without requiring access to licensed spectrum. Band 46 covers 5150 – 5925MHz and uses TDD-LTE technology. Contact CableFree for details.

Power 5G outdoor micro base station

Power Base Station

Base station power refers to the output power level of base stations, which is defined by specific maximum limits (24 dBm for Local Area base stations and 20 dBm for Home base stations) ...
