Power equipment inside the base station

Overview

Power systems are the heart of a base station. They give energy to keep everything running. These include power units, batteries, and backup generators. Batteries keep things working during power outages. Generators provide extra backup when needed. Modern cabinets have smart power systems.

Power equipment inside the base station

What is a Base Station?

The power of this 5G base station is very small, only 10 watts, which is not as powerful as a light bulb, let alone those household appliances. Without power, there is virtually ...
