

## SolarInvert Energy Solutions

# Power stations with different voltage generators

**51.2V 300AH**

## Overview

---

Those electric power lines which connect generating station (power station) or sub station to distributors are called feeders. Remember that current in feeders (in each point) is constant while the level of volta.

## How Large Electric Power

## Generators Work: The Basics

Large generators produce electricity at 20,000 volts, smaller generators output at 400 volts or 6000 volts. These voltages are "stepped up or down" as required for transmission and ...
