# Price of imported photovoltaic panels in Brazil

PUSUNG-R (Fit for 19 inch cabinet)

## Overview

---

Which country exports most photovoltaic modules to Brazil?

Because most of Brazil's photovoltaic modules are imported from China. From January to October this year, China exported US\$3.164 billion of photovoltaic modules to Brazil, ranking second among the top ten exporters of photovoltaic modules.

Why are solar panels so expensive in Brazil?

Despite global overcapacity, several factors may contribute to a slight increase in solar panel prices in Brazil, with shipping costs and quotas for fiscal exemptions on imported PV modules playing a key role. From pv magazine Brazil Brazil imported around 10.1 GW of PV modules between January and May, according to PV InfoLink.

When will photovoltaic imports come into force?

The measure, wanted by the Executive Management Committee of the Foreign Chamber of Commerce (Gecex-Camex), should enter into force on 1 January 2024 and remain active until 2017 with different methods for wind and solar. On photovoltaic import, in fact, it is not a matter of adding, but rather of taking away.

Is photovoltaic import a matter of adding or taking away?

On photovoltaic import, in fact, it is not a matter of adding, but rather of taking away. Gecex-Camex has decided to put an end to the reduction of the import tariffs of the assembled modules, since there is an internal production in the country, revoking also a series of fiscal subsidies on the import.
