How long do portable power supplies last?

The batteries that are used in portable power supplies are usually lithium-ion batteries. Even if these batteries are not used constantly, they will still age.

They do not have a terribly long lifespan. In fact, even if you barely use your power supply, the battery will probably only last you two to three years at full capacity.

How do you charge a portable power supply?

You can choose to charge it with a wall plug, DC outlet in your car, or, if you are feeling adventurous, with solar panels. This makes it a truly versatile device that is designed to be used both in the home and on the go. If you are in the market for a great portable power supply, we highly recommend that you give this one a try!
