# Prices of photovoltaic panels for villas in France

## Overview

---

For residential properties, prices typically range from €8,000 to €25,000 for systems between 3kWp and 9kWp (kilowatt-peak). Premium panels with higher efficiency and longer warranties command higher prices but often deliver better long-term returns. Should you invest in photovoltaic solar panels in France?

Invest in photovoltaic solar panels in France is an important decision for many individuals. With this technology, you can produce green electricity, save money on your energy bills and even generate additional income. Find out everything you need to know about solar panels in France to make the best possible choice.

Are solar panels a good investment for French property?

If you require advice and assistance with the purchase of French property and moving to France, then take a look at the France Insider Property Clinic. The installation of solar panels on residential property is a tempting proposition for many owners, but it is not without risk and the rewards are long-term.

How much does a photovoltaic installation cost?

The premium is €280 (€1,680 in total) for an installation generating 3kWp to 9kWp. In summary then, for a 3kWp photovoltaic installation where you sell the surplus to EDF, you receive €1,140 (i.e. €380 x 3) and 10 cents/kWh for the surplus electricity sold to EDF.

How much does a 3kw photovoltaic installation cost?

In summary then, for a 3kWp photovoltaic installation where you sell the surplus to EDF, you receive €1,140 (i.e. €380 x 3) and 10 cents/kWh for the surplus electricity sold to EDF. There are also some local councils who offer additional assistance, but they are few and far between.

Are photovoltaic installations taxable?

The good news is that income generated from photovoltaic installation no greater than 3k/W is exempt from income tax and social charges, provided the income is not part of a professional activity. For installations with a power output greater than 3kWp the income generated must be declared and it is taxable.

How do photovoltaic solar panels work?

THE photovoltaic solar panels transform the sun's energy into electricity using special cells called photovoltaic cells. These cells convert sunlight into direct electrical current (DC), which is then transformed into alternating current (AC) by an inverter.
