

SolarInvert Energy Solutions

Qatar Northwest Photovoltaic Solar Panels

Overview

Is Qatar a good place to develop solar energy?

Qatar boasts the ideal conditions for developing solar energy with its exceptional sunshine and vast unoccupied spaces. This is where the Al Kharsaah solar power plant, developed by TotalEnergies and its partners QatarEnergy and Marubeni, was inaugurated in October 2022.

How many megawatts does Qatar's new solar plant produce?

The addition of 875 megawatts from these two new solar plants, along with the 800 megawatts produced by the Al Kharsaah plant that came into service in 2022, will bring Qatar's total solar energy production capacity to nearly 1,700 megawatts.

Will Qatar install solar panels on a redundant roof?

To make up for Qatar's space constraints, the company plans to install solar panels on redundant surfaces such as roofs of power stations and water reservoirs, thereby utilizing existing power transmission lines which will substantially reduced construction costs.

How many solar panels will be installed in Doha?

The project has 417MW and 458MW solar plants, to be built in Mesaieed, about 40km south of the capital Doha, and in Ras Laffan, roughly 80km north of Doha respectively. Samsung C&T E&C is the exclusive engineering, procurement, and construction (EPC) contractor and will install 1.6 million solar panels.

Why should Qatar invest in solar energy?

Solar energy has multiple advantages for Qatar in the form of energy security, improved air quality, reduced GHG emissions, employment opportunities, apart from augmenting water and food security.
