

## SolarInvert Energy Solutions

# Qatar solar photovoltaic panel assembly

## Overview

---

How many solar PV projects are there in Qatar?

The installed capacity of solar power generation in Qatar was recorded as 5.1MW, as of 2020, which is far from the required targets to have a considerable share of renewables in the energy mix. Thus umpteen solar PV projects are lined up to boost the capacity in the nation.

Who makes solar energy in Qatar?

The state-owned group, Qatar Solar Energy, is a leading manufacturer of solar power components and last year opened the largest integrated production facility for solar energy systems in the Middle East and North Africa region. Even more recently, Qatar's Solar Technologies, took a 49% stake in German-based SolarWorld.

How many solar panels will be installed in Doha?

The project has 417MW and 458MW solar plants, to be built in Mesaieed, about 40km south of the capital Doha, and in Ras Laffan, roughly 80km north of Doha respectively. Samsung C&T E&C is the exclusive engineering, procurement, and construction (EPC) contractor and will install 1.6 million solar panels.

Is Qatar a good place to develop solar energy?

Qatar boasts the ideal conditions for developing solar energy with its exceptional sunshine and vast unoccupied spaces. This is where the Al Kharsaah solar power plant, developed by TotalEnergies and its partners QatarEnergy and Marubeni, was inaugurated in October 2022.

When will Qatar's new power plant be built?

Construction will begin in September 2022 and is expected to finish in November 2024. When complete, the plants will supply power to facilities in the industrial complex owned by QatarEnergy and Qatar's national electrical

grid.
