

SolarInvert Energy Solutions

Rack-mounted off-grid photovoltaic inverter

Overview

What is an off-grid solar power inverter?

An off-grid solar power inverter, also known as a stand-alone inverter or solar battery inverter, is a device used in an off-grid solar system. It operates independently of the power grid and can't feed electricity to the grid. It has no provision to tap into the grid electricity.

What is a 5000W 48V Hybrid off grid inverter?

FREE SHIPPING This 19 inch rack mount compatible 5000W 48V hybrid off grid inverter intelligently combines the functions of a 5000W pure sine wave inverter, 80A MPPT solar charge controller and a 60A smart battery charger in one single unit. This model can accept input from solar panels, mains power/generator and a battery.

What is a multi-function inverter/charger?

This is a multi-function inverter/charger, combining functions of inverter, solar charger and battery charger to offer uninterruptible power support with portable size.

What is a hybrid inverter?

This hybrid inverter is the perfect solution for any off-grid application with low or zero access to traditional mains power. This hybrid inverter features a zero transfer time Uninterrupted Power Supply (UPS). It makes it the ideal option for applications where the power supply is unreliable, intermittent or expensive to maintain.

Rack-mounted off-grid photovoltaic inverter
