Recent value of solar panels

Overview

Analyzing millions of transaction-level data points from homeowners on EnergySage, it highlighted a clear milestone for solar panels: The average price had dropped 30% year-over-year in 2024. How much did solar panels cost in 2024?

Analyzing millions of transaction-level data points from homeowners on EnergySage, it highlighted a clear milestone for solar panels: The average price had dropped 30% year-over-year in 2024. According to the report, the median quoted price of solar decreased for the third year in a row, hitting its lowest in recorded data at \$2.50 per watt.

How much do solar panels cost?

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system.

Do solar panels increase home values?

In the 2024 report, 31% of agents said they perceived solar to increase home values in their markets. Brett Johnson, owner of New Era Home Buyers, agrees. "I have noticed a trend where the presence of solar panels can greatly impact the sale of a home," Johnson says.

How much do Solar Homes sell for?

On average, across the United States, homes with solar sell for 6.9% more than homes without solar. The sale price increases by about \$25,000 for a home with solar. Four out of the 36 states in our study saw an increase of less than 2% on homes with solar. In one state (Alabama), non-solar homes sold for about 5% more than comparable solar homes.

How much does solar power cost in 2025?

Take control of your energy costs with solar power. Solar panels generate “free” electricity, but installing a system still costs money. A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs \$28,241 in 2025.

How much does a solar system cost per watt?

As of publishing, the average cost per watt is \$2.84. Most solar companies set the price according to the solar system's wattage. A solar installation's “cost per watt” is a little like the “price per square foot” when you buy a house. It helps compare the value of solar energy systems in different sizes.
