Replacement cost of rooftop photovoltaic panels

Overview

Costs depend on panel count, labor, racking changes, roof repairs, and permitting — expect \$2.50–\$4.50 per watt installed for panel-only replacement plus roof work. Typical small-system replacements (3–6 kW) often run \$5,000–\$12,000, while whole-system upgrades for 6–12 kW range \$10,000–\$25,000. How much does it cost to replace solar panels?

I have inspected hundreds of houses with solar panels, and here's what I learned about them: Removing and reinstalling solar panels for roof replacement will cost between \$1000 and \$6500, depending on the size of your roof, how many panels you have, and many other factors.

How much does a solar roof replacement cost?

The complexity of the solar system plays a significant role; larger and more intricate arrays often lead to higher costs for removal and reinstallation. Adding to this complexity is the base cost of the roof replacement itself, which as we mentioned above, averages around \$10,000, but can fluctuate based on various factors.

Should you get a free roof replacement with solar panels?

It's important to address the notion of free roof replacement with solar panels. A small number of companies may advertise free or no-cost roof replacements with solar panels thanks to partnerships with roofing companies. However, it's important to do your research when considering any such offer.

Can a solar panel be installed on a new roof?

The entire solar unit must be disabled, disbanded, and then reinstalled after the new roof is put back into place. It could be expensive because the charges for removing and reinstalling a solar panel onto the roof do not include the roof replacement bill. There is a step-by-step process of safely and securely mounting a solar panel on the roof.

How do you replace a solar panel on a roof?

For homeowners who already have solar panels installed but need to replace their roof, the process involves a few additional steps: Contact the solar panel installer: They will need to remove the panels and mounting hardware before roof work can begin. Coordination with the solar installer is crucial to ensure minimal downtime for the solar system.

How much does it cost to remove and reinstall roof panels?

It cost \$5,000 to remove and reinstall the panels after the roof was replaced. "If I had known the roof was in such bad shape, I would've replaced the roof before installing the panels," Devin told us.
