Retail price of Japan s multifunctional communication photovoltaic base station

Overview

What is the current situation in Japan's electricity market?

The situation of the electricity market in which former General Electricity Utilities are dominant remains unchanged and the same situation is observed in the power generation sector. The trading quantity on the Japan Electric Power Exchange (JEPX) accounts for 46.6% of the total demand (as of December 2022).

How much is a battery subsidy in Japan?

In most cases, subsidies range from 10,000 JPY/kW to 50,000 JPY/kW for PV systems and approximately 20,000 JPY/kWh for storage batteries. In FY 2022, the Tokyo Metropolitan Government (TMG) launched the “Project to promote the introduction of large grid-scale storage batteries”.

How many rural electrification projects are there in Japan?

The Ministry of Economy, Trade and Industry (METI) announced that the number of uncommissioned projects whose approval will expire at the end of March 2023 is expected to be about 50,000 projects or 4 GW. Since the entire nation is almost 100% electrified in Japan, there are no rural electrification measures.
