

SolarInvert Energy Solutions

Romania large container energy storage cabinet

Overview

How many GW of energy storage will Romania have?

Romania is aiming to have at least 2.5 GW of energy storage installed by the end of next year and to exceed 5 GW only a year later. From ESS News According to Romanian Minister of Energy Sebastian Burduja, the country's energy storage fleet is expected to grow exponentially over the next couple of years.

How big is Romania's energy storage fleet?

From ESS News According to Romanian Minister of Energy Sebastian Burduja, the country's energy storage fleet is expected to grow exponentially over the next couple of years. "In total, at the end of next year we should have storage capacities of at least 2,500 MW, and by 2026 we should exceed 5,000 MW.

Why are energy prices so high in Romania?

Burduja has also called for investments in energy storage, the lack of which he sees as one of the reasons behind high energy prices in Romania today, noting that the Ministry of Energy is making funding available for this purpose.
