

## SolarInvert Energy Solutions

# Russia develops batteries for communication base stations

## Overview

---

Who makes cellular base stations in Russia?

For example, Yadro has opened the first production line in Russia for electronic modules for cellular base stations, Izvestia was told by X Holding, which it belongs to. This is one of the key production elements required for a full-fledged large-scale production of base stations, which is scheduled for the end of this year.

Will Russian base stations speed up the development of Russian components?

Experts consider the mechanism timely, but emphasize that it will not speed up the development of Russian components. In early October 2022, it became known about the decision of the Government of the Russian Federation to support manufacturers of Russian base stations for 4G- and 5G networks .

When will Russian base stations be used?

Shadayev also explained that Russian base stations will be used initially in small settlements. Rostelecom President Mikhail Oseevsky, in turn, said that the first batches of Russian base stations are planned to be received in 2022.

Will a new LTE base station be made in Russia?

The head of the Ministry of Digital Science Maksut Shadayev said earlier in 2021 that an agreement had been reached with two manufacturers on localization in the Russian Federation, the transfer of rights to Russian partners for the production of modern LTE base stations.

Does Russia have a cellular network?

The Russian industry has begun to actively develop the production of equipment and components for cellular communications. Until 2022, base stations (BS), without which cellular networks cannot operate, were supplied to Russia by Nokia, Ericsson and Huawei. Since then, domestic companies have been actively engaged in import substitution.

How many base stations are there in Russia?

According to Vedomosti, by the end of November 2020, there are about 90 thousand base stations in the Russian capital, and with the launch of 5G networks, the number of such equipment will at least triple.
