

SolarInvert Energy Solutions

Russian rooftop photovoltaic panel prices

Overview

Does Russia have a solar PV potential?

So far, we have conducted calculations to evaluate the solar photovoltaic (PV) potential in 28 locations across Russia. This analysis provides insights into each city/location's potential for harnessing solar energy through PV installations. Link: [Solar PV potential in Russia by location](#).

Is Moscow a good place for solar PV projects?

The city itself lies on a plain that is part of the East European Plain. The area around Moscow has several large lakes, including Lake Seliger and Lake Nero, which could be suitable for solar PV projects. Areas to the south-east of the city have some higher elevations that could also be suited for larger scale solar PV projects.

How much electricity does Russia use a year?

1,559 kWh/kWp/yr in spring. These prices include all components of the electricity bill, such as power costs, distribution, and taxes. Russian power supply grid is very reliable; however, due to several causes, some sections of it are currently in a compromised state: 54.

Where did photovoltaic cost data come from?

Photovoltaic cost data between 1975 and 2003 has been taken from Nemet (2009), between 2004 and 2009 from Farmer & Lafond (2016), and since 2010 from IRENA. Prices from Nemet (2009) and Farmer & Lafond (2016) have been converted to 2024 US\$ using the US GDP deflator, to account for the effects of inflation.
