# Saint Lucia Communications 5G base station in the wild

## Overview

---

Launched in 1966, the privately owned Saint Lucia Television Station (SLTV) was the first service of its kind in the country; it relayed programming from the (CBC) of Barbados. In 1981, it was succeeded by the Helen Television Service (HTS), whose schedule consisted of American content sourced from satellite. • broadcast stations: 3 (of which two are commercial stations and one is a community).

Does Saint Lucia use GSM?

Saint Lucia uses GSM for their cellular communications, meaning that you need a GSM-capable phone to use your phone in the country. Fortunately, there is about a 99% chance your phone supports GSM. Besides that, you need to be aware of the ITU Regions to determine whether your phone will work in other parts of the world.

Can I use my phone in Saint Lucia?

Flow St. Lucia: Free! Can You Use Your Phone in Saint Lucia?

Saint Lucia uses GSM for their cellular communications, meaning that you need a GSM-capable phone to use your phone in the country. Fortunately, there is about a 99% chance your phone supports GSM.

Does Digicel St Lucia support 4G/LTE?

If you purchased your phone in Africa, Asia, Europe, or Oceania (ITU Regions 1 & 3) and have a low/medium-end device (without Tri-Band or Quad-Band) support, you want to go with Digicel St. Lucia. It supports traditional European frequencies on 2G and 3G, but you will not be able to use its 4G/LTE network.

How fast is a SIM card in Saint Lucia?

In the Caribbean, you can expect your speeds to range between 10 Mbps and 25 Mbps. With reasonably priced SIM cards, close to excellent nationwide coverage, decent mobile download speeds, and low mobile data rates, you should have a smooth network experience in Saint Lucia.

Does Saint Lucia have VoLTE & VoWiFi?

Both VoLTE (Voice over LTE (4G) – also known as HD Voice) and VoWiFi (Voice over WiFi – also known as WiFi calling) are not offered by the mobile operators in Saint Lucia (yet). This means that when you make a call, your phone will downgrade to 3G (or 2G when 3G is not available) instead of staying connected to 4G/LTE.

Which SIM card to buy in Saint Lucia?

If you want to buy the best SIM card in Saint Lucia, I recommend going with Digicel. It has the best coverage and the fastest speeds. Moreover, Digicel also has attractive plans (Prime Bundles) with dedicated data allowances for Prime apps, TikTok & YouTube (up to 45 GB/app).
