

SolarInvert Energy Solutions

Selling solar inverters

Overview

Can a wholesale solar company sell surplus solar equipment?

Wholesale solar companies have two main options for selling excess, surplus, clearance, and used PV equipment in the secondary market. They can utilize auction sites, and they can join EnergyBin, the wholesale solar B2B exchange for the world's PV professionals.

Are solar panels a good investment?

Solar panels offer more than just a way to reduce your carbon footprint—they can become a revenue-generating asset for your home or business. When you learn how to sell solar energy back to grid systems, you can turn excess electricity into actual income or significant bill credits.

Can you sell solar energy back to the grid?

This two-way relationship between your property and the electrical grid makes selling solar power possible. Here's how it works: The most common method for selling solar energy back to the grid is through net metering. Simply put, net metering allows your electric meter to "run backward" when you produce more energy than you use.

Can a battery system help you sell solar energy?

Battery systems can significantly enhance your ability to profit from selling solar energy by: The National Renewable Energy Laboratory (NREL) reports that adding battery storage to a solar system can increase the value of that system by 15% or more in many markets. Proper maintenance ensures your system generates maximum power:.

Can you sell solar power without battery storage?

Without battery storage, this excess electricity flows back into the utility grid for other customers to use. This two-way relationship between your property and the electrical grid makes selling solar power possible. Here's how it works:

The most common method for selling solar energy back to the grid is through net metering.

Should you sell your solar equipment at a solar auction?

The flexibility to sell single parts comes in handy for legacy models or project leftovers that attract buyers who are looking for replacement parts. While on auction sites, solar equipment lot sizes are large (usually starting at 500 kilowatts and spanning into megawatt levels).
