

SolarInvert Energy Solutions

Semi-flexible photovoltaic panel lifespan

Overview

The average lifespan of flexible solar panels is typically between 15 to 20 years, although some high-quality models may last longer, even up to 30 years. This is slightly shorter than traditional rigid solar panels, which can last between 25 and 30 years.

Semi-flexible photovoltaic panel lifespan

Semi-flexible solar panel lifespan

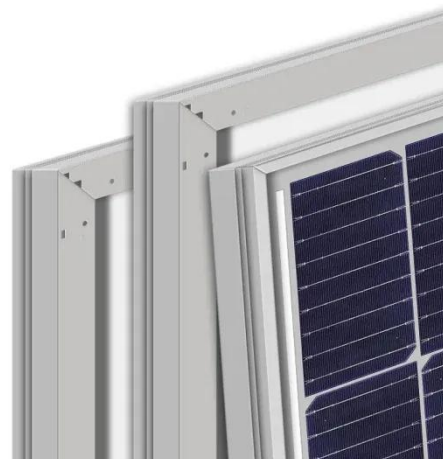

A semi-flexible solar panel is somewhere between a flexible solar panel and the rigid, higher-efficiency solar panels you're more likely to see on the roofs of UK homes.
