

SolarInvert Energy Solutions

Serbia Power Supply Solar System Sales

Overview

Serbia's solar market topped 5,000 prosumers in the first half of 2025, though no plants above 10 MW are online. The country has a gigawatt-scale pipeline and procured 124.8 MW in its February renewables auction. Is Serbia a good market for solar energy?

In conclusion, Serbia is still a very young but promising market in the solar energy sector, with some fast-growing solar distributors. Many top solar distributors, solar panel manufacturers and suppliers are in partnership with European companies.

Will Serbia be able to supply electricity at market prices?

For the first time, consumers in Serbia are to be supplied electricity at market prices by a non-state-owned supplier.

Who owns the electricity market in Serbia?

1.3.1 The Serbian electricity market is dominated by the state-owned public companies EPS, EMS and their subsidiaries (see paragraphs 2.1.1, 2.2.1 and 2.3.1 below). However, some private companies are active in the electricity wholesale market, including the import and export of electricity.

Will Serbia offer solar incentives to power production companies?

The Serbian government announced that it would offer power production firms solar incentives to encourage and promote rooftop solar installations in the country. The government also announced that the companies selected for this benefit would be determined through the auctions.

What is Serbia's energy supply in 2021?

In 2021 Serbia's total energy supply was almost 700 PJ, with the energy mix comprising coal (45%), oil (24%), gas (15%), and renewables (16%). Bioenergy and hydroelectric power were the leading contributors within the renewable energy category, accounting for 67% and 29% of the renewable

supply, respectively.

How much electricity is produced in Serbia?

Electricity production in Serbia relies around 66 per cent on low-quality lignite coal, causing serious pollution, while most of the remainder is generated in hydropower plants. Despite strong growth in wind power in recent years, in 2022 it still made up only three per cent of electricity generated.

Serbia Power Supply Solar System Sales

Increasing Demand for Solar Panels , Over 3,000 Prosumers in Serbia

According to data from Elektro distribucija Srbije, there are currently 3,028 registered prosumers, with households making up the majority, using this method to reduce their energy bills.
