

## SolarInvert Energy Solutions

# Sierra Leone Solar Base Station

## Overview

---

Baoma Solar Power Station, is a 25 megawatts (34,000 hp) solar power plant under construction in Sierra Leone. The first phase of this renewable energy infrastructure with generation capacity of 5 MW is operational and was commercially commissioned in December 2022. The second phase with generation capacity.

The power station is located in the village of Yamandu, in the of the country, near the city of . (This location is different from , a town in the of Sierra Leone).Yamandu in Sierra.

The power station was developed and is operated by , an (IPP) headquartered in Nairobi, Kenya that focuses on sub.

The power station design calls for generation capacity of 25 megawatts. The solar farm was constructed in two phases. Phase 1, also referred to as Baoma 1 Solar Power Station (Baoma 1), with capacity of 5 MW was commercially commissioned in.

The first phase reached commercial commissioning in 2022. The second and final phase is expected online in or after 2023. The entire constructing is expected to cost US\$35 million.

Baoma Solar Power Station, is a 25 megawatts (34,000 hp) solar power plant under construction in Sierra Leone. The first phase of this renewable energy infrastructure with generation capacity of 5 MW is operational and was commercially commissioned in December 2022.
