

## SolarInvert Energy Solutions

# Simple large-capacity outdoor power supply

## Overview

---

What is a high-capacity portable power station?

Large, high-capacity portable power stations are equipped with lithium battery storage, flexible charging capabilities can meet a wide range of charging needs, and run for a long time. Such as emergency use of drones, TVs, electric fans, notebooks, mobile digital cameras and other small appliances.

How to choose a portable power station?

While you will find certain ports across the board with portable power stations, from AC outlets to USB-A, it is crucial to check the maximum charging rate and supported charging standards to avoid disappointment. You might find USB-C ports, car ports, barrel ports, and maybe inputs for solar, but assume nothing. Check the specs before you buy.

What is the best portable power station?

By far the most portable power station in our guide, the EcoFlow River 2 Pro weighs just 17 pounds and has a large handle along the back. The LiFeP04 battery inside is good for 768 watt-hours, and I managed to squeeze a little more out of it in my tests. The ports are great for camping trips, with everything you need to charge small gadgets.

What can a portable power station charge?

All portable power stations can charge up small gadgets like phones and laptops or be used to power lighting. Most can handle small appliances like mini-fridges or TVs. If you want to use power tools, an AC unit, or in the UK, a kettle, you need to be able to draw thousands of watts.

Is zendure a good power supply?

Zendure also offers semi-solid-state batteries in its top-of-the-line SuperBase listed above, which it promises are more stable and resilient, therefore safer, and have a higher energy density. Some power stations can act as an

uninterruptible power supply (UPS); others are classed as an emergency power supply (EPS).

Do power stations have a surge function?

Power stations all state the maximum output, but they often have a surge function that enables them to go higher for a short period. Sometimes, they give it a silly name. For example, Zendure calls this “AmpUp,” and EcoFlow calls it “X-Boost.” Make sure your chosen power station can handle the wattage you need.
