# Singapore imports solar photovoltaic panels

## Overview

---

Will Singapore import solar power from Indonesia?

She also covers wider economic news and monetary policy. Singapore will issue conditional approval to import 1.4 gigawatts (GW) of electricity from two solar power projects in Indonesia as the country ramps up low-carbon power supply, senior minister Teo Chee Hean said in Indonesia on Thursday.

Will Singa be able to export solar energy to Singapore?

Beyond the export to Singapore, Singa will also provide solar PV energy for Indonesia's domestic needs, specifically to power green industrial complexes in the Riau Province. This aligns with Indonesia's ambitious goal of increasing its renewable energy usage from 13% in 2023 to 31% by 2050.

Can Singapore get solar energy?

Presently, Singapore relies upon imported fossil fuels. In the future, Singapore could procure large amounts of solar energy from nearby nations, including Indonesia, Malaysia, Thailand and Australia. This solar energy could be transmitted to Singapore through undersea HVDC cables. Wind energy could also be imported from Vietnam.

How can solar energy be transmitted to Singapore?

This solar energy could be transmitted to Singapore through undersea HVDC cables. Wind energy could also be imported from Vietnam. Undersea HVDC cables are expensive and require complex negotiations with neighboring countries.

Why is Singapore launching a solar energy partnership with Indonesia?

The announcement was made by Singapore's Minister for Manpower and Second Minister for Trade and Industry, Dr. Tan See Leng, during the Indonesia International Sustainability Forum 2024. This marks a crucial milestone in advancing renewable energy cooperation within Southeast Asia,

utilizing Indonesia's vast solar resources.

How many GW CAN a solar power system deliver to Singapore?

The two reservoirs could accommodate more than 100 GW of floating solar. For a solar power system in Sarawak or Sumatra, with a solar capacity factor (CF) of 15%, about 7 GW of solar capacity is required to deliver 1 GW continuously (24/7) via a cable to Singapore: 8760 GWh (nearly 9 TWh) per year.
