

## SolarInvert Energy Solutions

# Solar Panel Industry Observation

## Overview

---

The US solar industry installed 7.5 gigawatts direct current (GW dc) of capacity in Q2 2025, a 24% decline from Q2 2024 and a 28% decrease since Q1 2025. Solar accounted for 56% of all new electricity-generating capacity added to the US grid in the first half of 2025, with a total of 18 GW installed. What will drive the growth of solar PV panels industry?

Growing demand for renewables-based clean electricity coupled with government policies, tax rebates, and incentives to install solar panels is expected to drive the growth of solar PV panels industry in the coming years. Asia Pacific held the largest market share of over 54.0% in 2023.

How will solar impact the energy industry?

The industry remains optimistic about the role of solar in achieving energy dominance and meeting rising electricity demand. State-level initiatives and corporate demand will gain more relevance and drive solar development, potentially mitigating the impact of federal mandates.

What factors influence the competitiveness of solar PV panel industry?

The high degree of forward integration, security of raw material feedstock, technology sourcing, skilled manpower, and strong R&D are among the prominent factors governing the competitiveness of solar PV panel industry. Globally, rising renewable energy demand in addition to growing energy security concerns is driving market growth.

What are NREL's quarterly solar industry updates?

NREL's quarterly solar industry updates provide information on trends within the solar industry. These quarterly updates cover an array of photovoltaic module and system technologies as well as energy storage and concentrating solar power. The quarterly solar industry updates often cover: Updates on related government programs and policies.

How are the proposed measures affecting the solar sector?

The proposed measures have varying degrees of impact on each solar segment. We have identified some initiatives that are contributing to a challenging environment for the sector: Energy emergency declaration. President Trump declared an energy emergency, prioritizing thermal and hydropower generation over wind, solar and storage.

What is the market share of solar PV panels in 2023?

Based on application, the industrial segment accounted for a dominant share of over 40.0% in solar PV panels sector in 2023. Companies in the commercial and industrial sectors are among the major consumers of solar photovoltaic panels owing to the large-scale demand for green energy.
