.

How big are solar panels?

This is the typical classification of solar panel sizes (based on the solar cell size). It's a bit theoretical and quite useless for most calculations. The only useful thing that we get from this is depth or height (panel thickness): Most solar panels are about 1.5 inches thick.

How much does it cost to clean solar panels?

Solar panels require very little upkeep. If you're able to clean the solar panels

yourself, the only maintenance cost will be the water used to hose them down. If you hire a professional to clean your solar panels, it will cost around \$100 to \$350, on average.

How much does a solar system cost per watt?

As of publishing, the average cost per watt is \$2.84. Most solar companies set the price according to the solar system's wattage. A solar installation's "cost per watt" is a little like the "price per square foot" when you buy a house. It helps compare the value of solar energy systems in different sizes.
