

SolarInvert Energy Solutions

Solar panels and photovoltaic components and prices

Overview

How much does a residential solar system cost?

What are the rough costs for a typical residential solar system?

A typical home solar system ranges from 5-8 kilowatts and costs \$15,000 to \$25,000 before tax credits and rebates are applied. The final out-of-pocket cost after incentives averages \$10,000 to \$15,000.

How much does a CPV solar system cost?

Concentrated photovoltaic (CPV) panels are \$0.80 to \$1.10 per watt. While not as well-known as other types of panels, CPV panels are highly efficient and may grow in popularity. A 6 kW solar system would cost \$4,800 to \$6,600. A single solar cell costs about \$0.30 and most panels use 60 or 72 cells. The more cells in a panel, the higher the cost.

How much do solar panels cost?

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system.

How much does a commercial solar system cost?

Commercial solar systems cost 15-25% less per watt than home systems. Businesses usually see faster payback than homeowners because they use more power during daylight hours and can take advantage of tax benefits. Total cost before incentives: \$2.30-\$2.80 per watt (\$23,000-\$70,000).

How much does a roof solar panel system cost?

The cost of expanding a roof solar panel system depends largely on the number of solar panels. Typically, homeowners need to pay around \$1000 for

the installation (including plans and permits) and then around \$500-\$700 per new panel.

How much does solar installation cost?

On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system. What else affects solar installation costs?
