

## SolarInvert Energy Solutions

# Solar photovoltaic power generation special-shaped panels

## Overview

---

Solar panels are now a common source of renewable energy generation and becoming a common part of urban landscapes. They can range from a large-scale solar farm to a few solar panels on the roof of a bungalow, for example. How solar panels look might change in the future though, and this article.

The group of scientists have been considering the hypothetical performance of pyramidal, hexagonal, and conical shapes for solar.

Out of the three novel shapes researched in this study, the conical-shaped panels have emerged as the option with the best thermal performance.

Pager Power has a strong experience in assessing glint and glare generated by solar power plants and can help developers to determine the impact upon nearby receptors such as: nearby road users, residential amenity, aviation activity and railway infrastructure. For more information about what we do, please get in touch.

"Thermal, efficiency and power output evaluation of pyramid, hexagonal and conical forms as solar panel," Case Studies in Thermal Engineering, vol. 27, 2021. E. Bellini, "Conical-shaped solar panels cooled by forced airflow," PV Magazine, 13 July 2021. [Online]. Available: <https://>.
