

SolarInvert Energy Solutions

Solar power generation in Honduras

Overview

In 2015, Honduras ranked as the second largest producer of solar electricity in Latin America (behind Chile, but ahead of Mexico). Honduras has a large potential for solar photovoltaic generation.

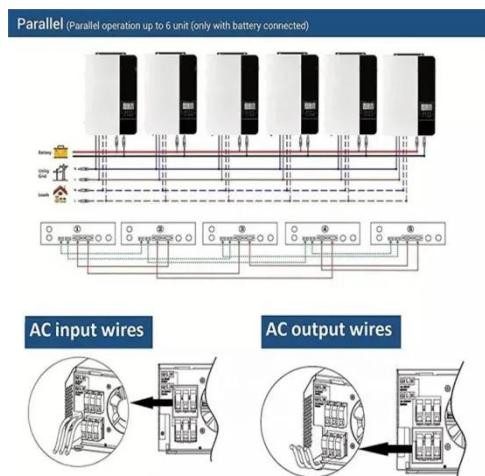

In Honduras, there is an important potential of untapped indigenous resources. Due to the variability of high oil prices and declining renewable infrastructure costs, such resources could be.

In 2022, Honduras' energy mix was dominated by oil, constituting 54.9% of the total energy supply, followed by biofuels and waste at 32.2%. Modern renewables like hydro, solar, and wind, excluding traditional biomass practices like burning wood or agricultural.

Decrees No. 85-98 and 267-98 promote the development of renewable energy-generating plants. The decrees include tax breaks to developers and a secure buyer for energy at prices equivalent to the system's short-term marginal cost. The national integrated.

In 2021, renewable electricity generation from non-combustible sources was led by hydro, representing 62.5% of the total. Solar photovoltaic (PV) energy followed at 18.9%, with wind power at 12.9%, and geothermal energy at 5.8%. [2]

12.8V6Ah

Nominal voltage (V):12.8
Nominal capacity (Ah):6
Rated energy (Wh):76.8
Maximum charging voltage (V):14.6
Maximum charging current (A):6
Floating charge voltage (V):13.6~13.8
Maximum continuous discharge current (A):10
Maximum peak discharge current @10 seconds (A):20
Maximum load power (W):100
Discharge cut-off voltage (V):10.8
Charging temperature (°C):-20~+50
Discharge temperature (°C):-20~+50
Working humidity: <95% R.H (non condensing)
Number of cycles (25 °C, 0.5c, 100% doD): >2000
Cell combination mode: 32700-4s1p
Terminal specification: T2 (6.3mm)
Protection grade: IP65
Overall dimension (mm):90*70*107mm
Reference weight (kg):0.7
Certification: un38.3/msds
