Solar waterproof power generation tile

Lithium Solar Generator: S150

Overview

This Renowise solar tile combines roof structure and clean power generation into one. Unlike traditional mono- or poly-crystalline panels, this solar tile looks pleasing and elegant on your rooftop.

Both the single-glass and double-glass models have a triple-arch unique structure that resembles the shape of a terracotta concrete standard or lightweight tile. However, while the.

Both the single-glass and double-glass models have passed CE, Canadian, UL, TuV and China compulsory certifications.

In both models, each solar roof tile is made out of copper indium gallium selenide (CIGS) solar cells that provide a total power output of.

Moreover, since the solar tile acts as the roof structure of your house, it is also important to mention that the loading grade that both single and double-glass tiles can withstand is.

Photovoltaic ceramic tiles ensure that the tiles have good waterproof function in general stormy weather through professional overlapping corner, waterproof line and wind line design. Therefore, the photovoltaic ceramic tile roof has good primary waterproof performance.

Solar waterproof power generation tile

Solar Roof Tiles Direct from Manufacturer: Design Meets Energy

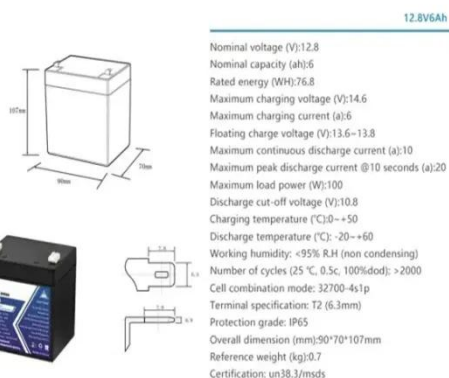

Transform your roof into a power generator without compromising aesthetics. Couleenergy manufactures solar tiles in multiple colors and textures that perfectly mimic slate, ...
