

SolarInvert Energy Solutions

Solar wave tiles

Overview

What are solar tiles?

Solar tiles are roofing materials that can produce energy directly from sunlight. Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof.

What are photovoltaic solar tiles?

Photovoltaic solar tiles are a new technology option for solar energy systems because they have several advantages over conventional solar panels. Because of their resilience and lightweight construction, they can withstand high wind speeds and temperatures while simplifying installation.

What is A Midsummer wave solar roof?

With Midsummer's solar roof, you no longer have to compromise between solar energy and aesthetics. Midsummer WAVE is a wave-shaped solar panel that follows the shape of your roof tiles.

How do solar tiles work?

Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof. Photovoltaic cells in solar tiles turn sunlight into direct current (DC) energy.

What is A Midsummer wave solar panel?

Midsummer WAVE is a wave-shaped solar panel that follows the shape of your roof tiles. The product is suitable for Sweden's most popular roof tiles Palema from Benders, Jönåker from Monier and Mjöbäck/Ekeby from S:t Eriks and is either sold as a retrofit on existing roof tiles or as a complete roof renovation.

Who is Solar Wave?

At Solar Wave, we are committed to helping Colorado residents make the switch to clean energy. As a leading solar installation company in the area, we make the process easy and hassle-free with our instant online quotes and expert team of local installers. Ready to take the first step towards energy independence?
