# South Africa installs solar panels for power generation

## Overview

---

South Africa has experienced an increase in the installation of solar PV since 1992. The low electricity offered by prior to 2010 has led to a recently rapid installation increase. The shift in installations can be seen across all segments of consumers including industrial, agricultural, commercial and residential. There are predictions that indicate that there would be a continuous decline in the cost of well beyond 2020.

South Africa's solar capacity expanded by 11.9% in 2024, reaching 8.97 GW. The private sector contributed 6.1 GW, while public procurement projects added 2.8 GW. By October last year, an additional 961 MW of private-sector solar had been installed, showing strong momentum.
