

## SolarInvert Energy Solutions

# South Africa s commercial and industrial photovoltaics with energy storage

## Overview

---

How does industrial solar PV work in South Africa?

In South Africa, it's common for industrial solar PV to be funded through power purchase agreements (PPAs) or leases with solar providers, effectively buying the solar energy as a service. This shifts the burden of CAPEX to an independent power producer, while the industrial off-taker just pays a tariff per kWh (OPEX) often lower than Eskom rates.

Is solar PV a viable option for commercial businesses in South Africa?

For the commercial sector, solar PV is currently economical to install PV currently because the tariff is higher than the levelized cost of electricity. A significant number of businesses across the economy of South Africa are installing distributed PV on their premises to reduce their electricity costs , .

Is solar a viable investment in South Africa?

South Africa's industrial solar market has matured rapidly – what was once a fringe consideration has become a mainstream strategic investment for factories, mines, and commercial operations alike. Owners and managers evaluating solar today have a spectrum of technologies and business models at their disposal.

How much solar PV is installed in South Africa?

In 2017, about 387 MW of solar PV installed in South Africa was rooftop systems . In 2021, about 1500 MW of solar PV installation capacity was for solar rooftop systems . This will offer an opportunity to use this review to inform how buildings within these sectors can be used to forecast rooftop solar PV uptake.

What is the South African Solar Photovoltaic Industry Association?

67 South African Photovoltaic Industry Association, The localisation potential of the South African solar photovoltaics (PV) industry and recommendations to

support local manufacturing in South Africa. 68 Rivett-Carnac, Insights into the Solar Photovoltaic Manufacturing Value Chain in South Africa.

Does South Africa Import solar PV components?

Exponential growth in the uptake of solar PV has seen South Africa import billions worth of solar PV components over the last few years.
