# Southeast Asia container power generation

## Overview

---

Does ASEAN have technology options to decarbonize power sector?

Faced with energy transition objectives, the ten countries of the Association of Southeast Asian Nations (ASEAN) have technology options to decarbonize power sector. This study investigates the hypothetical decarbonization pathways for ASEAN's power sector.

How can the ASEAN Power Grid facilitate investments in renewables?

To facilitate investments in renewables in ASEAN, it is critical to overcoming the barriers in renewable energy legislation, energy governance, and business environment. 28 Cooperation through the ASEAN Power Grid brings economic benefits to the region as a whole, and thus improves the affordability for energy transition.

How much money does Southeast Asia Invest in energy?

However, fossil fuel investment decreased from USD 70 billion in 2015 to USD 50 billion in 2025 while clean energy investment reached USD 47 billion, up from 30 billion in 2015. Given the challenges of accessing international capital markets, Southeast Asia's capital markets have relied on domestic commercial lending.

Does Southeast Asia have a coal-fired power system?

Concurrently, coal-fired power has remained a significant component of Southeast Asia's energy mix. Investment in coal plants has risen steadily throughout the past 20 years, reaching 121 GW of installed capacity in 2025.

Will the next US administration reinvigorate Southeast Asia's energy transition plans?

With elections in November and President Joe Biden declining to run for another term, the next U.S. administration has an opportunity to reinvigorate and double down on the United States' critical role in Southeast Asia's energy

transition plans.

Does ASEAN have a high share of decarbonised energy?

Hence, the share of fossil fuels in energy consumption has further increased over the last decade in ASEAN as a whole. Nevertheless, there has been a rapid development of renewables in recent years, and some ASEAN countries already have a high share of decarbonised energy in their power mix.
