

## **SolarInvert Energy Solutions**

# **Southern European Energy Storage Retrofit Project**

## Overview

---

What is the European energy storage inventory?

The European Energy Storage Inventory, developed by the Joint Research Centre (JRC) of the European Commission, is a new interactive platform that maps and analyzes over 1771 energy storage projects across Europe.

How many energy storage projects are there in Europe?

The goal is to list all planned and operational energy storage projects in Europe by location and technology. The dashboard can be filtered by country, project status and technology. It lists 32 countries and is led by Germany, with 472 projects. It is followed by the United Kingdom (455 projects), Spain (147 projects) and Italy (112 projects).

Is hydrogen storage a key component of EU energy transition strategy?

Hydrogen Storage Market: Hydrogen storage is also emerging as a critical component in the EU's energy transition strategy. As green hydrogen production ramps up, the EU has seen a notable increase in pilot projects and investments in hydrogen storage facilities, including underground storage for long-term energy needs.
