Swiss mobile energy storage charging station electricity prices

Overview

How much does a kWh charge cost in Switzerland?

In general, a full charge will cost around 12 to 20 Swiss francs at a peak rate and around 10 francs at a low rate. At quick charging stations, the price for a kWh is generally higher. You can pay with a credit card, but the more common and most recommended option is to pay via a provider's charging card or via its app (see the next point).

How much does a charging station cost in Switzerland?

These are usually expensive and cost between 50 cents and CHF 1 per kWh. Good to know: in Switzerland, parking spaces with the 'charging station' symbol are exclusively intended for charging electric cars. This means that the vehicle has to be actively charging the entire time it is parked.

Where can I charge my electric car for free in Switzerland?

There are numerous options for charging your electric car for free in Switzerland – usually in shopping centres, hotels or restaurants. We recommend the online platform gratis-laden.com for finding free charging stations. Charging your electric car in Switzerland with Clyde: included on request.

How much does it cost to charge a car in Switzerland?

Around 80% of charging processes in Switzerland take place at private (or company-owned) charging stations like these. The AMAG home charging station costs around 1600 Swiss francs (not including installation). Charging stations for electric cars: Where, how long, how expensive?

.

How can I reduce my charging costs in Switzerland?

Use these off-peak times at night, for example, to reduce your charging costs.

Charging modes: Various types of charging stations are available in Switzerland, including normal household sockets, standard charging stations and fast charging stations.

How much does electricity cost in Switzerland?

In Switzerland, the average is between 15 cents and 30 cents per kWh. For 2025, the median electricity price for households is 29 cents per kWh (2). Do you own your own home and want to be as independent of fluctuating electricity prices as possible?

Then it's worth investing in a photovoltaic system.
