

## SolarInvert Energy Solutions

# The cost of one watt of lead-carbon energy storage

## Overview

---

Current lead carbon battery prices hover between \$150-\$300 per kWh. But wait—before you compare this to lithium-ion's \$400-\$800 range and start celebrating, there's a plot twist. Lead-carbon's real value shines in applications where cycle life and partial-state charging matter more than compact size.

## The cost of one watt of lead-carbon energy storage

### Levelized Costs of New Generation Resources in the Annual ...

This paper presents average values of levelized costs for new generation resources as represented in the National Energy Modeling System (NEMS) for our Annual Energy Outlook ...
