Types of uninterruptible power supply for base station rooms

Overview

This article provided an outline of the primary types of Uninterruptible Power Supplies (UPS) Systems. For information on other topics, consult our additional guides or visit the Thomas Supplier Discovery Platform where you can locate potential sources of supply for over 70,000 different product and.

Perhaps the simplest example of a UPS with which we are familiar is the battery backup used in personal computers. Laptop and tablet computers are powered.

UPS systems can generally be classified as being one of these five types: 1. Standby UPS 2. Line-interactive UPS 3. Standby-ferro UPS 4. Double conversion online.

The three major types of UPS system configurations are online double conversion, line-interactive and offline (also called standby and battery backup). These UPS systems are defined by how power moves through the unit. AC power is stable and clean upon generation.
