

## SolarInvert Energy Solutions

# Ukraine station energy storage project

## Overview

---

Ukrainian private utility DTEK has energised the largest battery storage project in the war-torn country and one of the biggest ones in Eastern Europe. The 200 MW/400 MWh installation spans six sites ranging from 20 MW to 50 MW and connected to the power grid in the Kyiv and Dnipropetrovsk regions. How many battery energy storage systems are there in Ukraine?

The project includes six battery energy storage systems of varying capacities – from 20 to 50 MW each – connected to the Ukrainian power grid. Collectively, the systems have the capacity to store 400 MWh of electricity, enough to power 600,000 Ukrainian homes for two hours.

How many gas storage facilities are there in Ukraine?

Ukraine has 12 gas storage facilities operated by Ukrtransgaz. Five of these are located in Western Ukraine, two in Central Ukraine and five in Eastern Ukraine. In addition one gas storage, the Hlibivske storage facility, operated by Chornomornaftogaz, is located in Crimea and currently is not controlled by Ukraine authorities.

How much electricity can a fluence system store in Ukraine?

Collectively, the systems have the capacity to store 400 MWh of electricity, enough to power 600,000 Ukrainian homes for two hours. The storage systems, leveraging Fluence's innovative storage technology, are expected to enhance grid stability and resilience in Ukraine through advanced grid-forming capabilities.

Can Fluence improve grid stability & resilience in Ukraine?

The storage systems, leveraging Fluence's innovative storage technology, are expected to enhance grid stability and resilience in Ukraine through advanced grid-forming capabilities. The project's construction was completed in only six months, significantly faster than the industry average for projects of such complexity.
