

## SolarInvert Energy Solutions

# Ultra-large capacity 16 8v lithium battery pack

## Overview

---

What are Ultralife rechargeable lithium ion hard packs?

Housed in a tough plastic case, ULTRALIFE's rechargeable Lithium-ion (Li-ion) Hard Packs are ideal for devices that require a hard-wearing power solution. Cases can be custom branded (volume dependent) for resellers or to match the device design. Battery voltages range from 3.7 to 28.8V, with energy ratings from 4.2 to 92.2Wh.

What are Ultralife battery packs?

Embeddable and hot-swappable battery packs Housed in a tough plastic case, ULTRALIFE's rechargeable Lithium-ion (Li-ion) Hard Packs are ideal for devices that require a hard-wearing power solution. Cases can be custom branded (volume dependent) for resellers or to match the device design.

Are Ultralife batteries rechargeable?

ULTRALIFE's rechargeable battery packs utilize world-leading chemistries to serve a diverse range of power requirements. The majority of packs contain Lithium-ion chemistry, including the specialized UBI-2590 military and industrial range, as well as the Land Warrior series that was designed in conjunction with the US army.

What is the capacity of a Samsung Galaxy XP XL battery?

Featuring a robust 16.8V output and a high capacity of 2500mAh, this battery provides reliable and long-lasting power. Its compact structure and lightweight design ensure easy integration into various devices while delivering consistent performance for high-demand applications.

What is Ultralife lithium ion?

For more standardized power, ULTRALIFE manufactures Lithium-ion Hard Packs and Soft Packs that are available in various voltages and have an energy rating under 100Wh (simplifying shipping). In addition to Lithium-ion,

ULTRALIFE was one of the first companies to introduce batteries containing Lithium Iron Phosphate chemistry.

How many batteries can a Land Warrior carry?

Using a power distribution manager, one or two Land Warrior batteries can power many devices, such as flashlights, radios or GPS computers. This means that a soldier is carrying up to four times fewer batteries (reducing the weight from 10Kg to 2Kg).
