

## SolarInvert Energy Solutions

# Venezuela Electric Photovoltaic Panel Size

## Overview

---

How much solar power does Venezuela have?

According to the latest statistics published by the International Renewable Energy Agency, Venezuela had around 5.32 MW of installed solar PV power generation capacity in 2019. In 2019, the Venezuelan government announced a plan to build its first utility-scale PV project to strengthen its National Electric System.

Does Venezuela have a solar panel factory?

The engineer says: “It’s incredible, but in Venezuela, in the industrial region of Paraguaná, we have a solar panel factory, but it doesn’t have any staff. There’s materials in the storage facilities to produce for three years and supply the entire country with alternative systems.

Should Venezuela be filled with photovoltaic panels?

Venezuela should have been filled with photovoltaic panels a long time ago. But the electrical emergency is opening up a small path for this energy source, and the state hasn’t taken advantage of this technology yet.

What is the Venezuela plan for the national electric system?

The Venezuela Plan for the National Electric System aims to integrate renewables in the power system by including them in medium and long-term strategies. It aims to develop the use of renewables within isolated rural communities includes solar.

How much wind power does Venezuela have?

At the end of 2019, Venezuela held 71.28 MW of installed wind capacity, a much higher capacity compared to the solar PV installed capacity as of 2019. Venezuela is also planning to build wind farms with a generating capacity of 10,000 MW over the next 15 years.
