

## SolarInvert Energy Solutions

# Vietnam export photovoltaic panel prices

## Overview

---

For households, a 3 kWp system typically costs 35–45 million VND, while a 10 kWp system ranges between 90–150 million VND. Large-scale commercial installations are more cost-effective, at around 8–10 million VND/kWp. How much will a solar PV project cost in Vietnam?

Central to the growth of the solar PV industry in Vietnam was the announcement in 2017 that projects commissioned before the end of June 2019 would qualify for a 20-year FIT contract of US\$0.0935/kilowatt hour (kWh), leading to a rush to get projects off the ground.

How much does electricity cost in Vietnam?

Vietnam Electricity (EVN) set the electricity price to USD 0.083 per kWh on October 11, 2024. 3 Vietnam has provided electricity access to 100 % of its population since 2017. 4 System Losses: According to EVN's annual reports, the overall system losses in Electricity Infrastructure in Vietnam were 6.25% in 2022. 5 There is currently no contribution.

Will new tariffs affect Vietnam's green energy export industry?

Industry insiders consider the new tariff alarming, representing a major shock to Vietnam's green energy export industry. The US has been one of Vietnam's largest markets for solar equipment. The new tariffs will increase costs and risk, causing Vietnamese manufacturers to lose market share in the US.

Why is it important for Vietnam to expand into new markets?

It is urgent for Vietnam to pivot quickly, expanding into new markets including Europe, Japan and Australia, while enhancing competitiveness and adhering more strictly to international standards to overcome the growing wave of trade barriers.
