

## SolarInvert Energy Solutions

# What are the specifications of 340w photovoltaic panels

## Overview

---

With a maximum power output of 340W, module efficiency of 17.5%, and dimensions of 1956 mm x 991 mm x 40 mm, this panel ensures optimal energy yield. It also supports a maximum system voltage of 1500V DC, making it ideal for both residential and commercial installations. What are 340 watt solar panels?

The 340 Watt solar panels that we currently offer are 96 cell solar panels that are very similar to 60 cell solar panels due to the use of smaller solar cells. 340 Watt solar panels we offer have eight solar cells going across and 12 solar cells going down. The dimensions of a 340 Watt solar panel are about 62.5" x 41.5" x 1.6".

What is a N340 solar panel?

Featuring a 20.3 module efficiency and 340 watts per panel, N340 delivers an advanced renewable energy source with zero emissions for any home. A temperature coefficient rating of  $-0.258\%/^{\circ}\text{C}$ , one of the lowest in the world, helps generate greater electricity output on the hottest days. Higher power output and greater energy yields.

What is a 96-cell hit® N340 solar panel?

The 96-cell HIT® N340 solar panel is equipped with a new 40mm frame, which increases durability and strength, being able to handle loads of up to 5400Pa. Also, the water drainage system gives rainwater and snowmelt a place to go, reducing water stains and soiling. Less dirt on the module means more sunlight getting through to generate power.

What is a viridian pv16-340-g1 solar panel?

The Viridian PV16-340-G1 is a 340W Monocrystalline Solar Panel with a white backing sheet. The panel has a compact design and allows simple roof integration with a clean, low-profile aesthetic. G1 panels are easy to install and are compatible with a wide range of slate and tile.
