What is the cost of EMS application for communication base stations

Overview

How do I select a EMS base station Radio?

To select a channel on an EMS base station radio, you should set the channel selector on the local primary channel as used in your area. The channel select button must be depressed in order to transmit on the selected frequency.

What is the New Mexico EMScom system?

The New Mexico EMSCOM System is a radio communication system that operates on the UHF (ultra-high frequency) radio band and is licensed Radio Service (EMRS) frequencies under the Federal Communications Commission (FCC).

What are the main functions of the EMSCOM system?

The EMSCOM system's main functions are to provide communications between ambulance/rescue and hospital emergency rooms to allow notification of incoming injured patients to health care facilities.

What is the Santa Fe EMS system?

The Santa Fe EMS system is a priority system in cases of emergency radio communications traffic. Santa Fe Control can assist any EMS provider as needed during an emergency and can dispatch EMS for any area upon request by State Police, Sheriff, or private parties.

How do I use the EMScom system?

When using the EMScom system, always identify whom you are calling, give your unit number, name of service, and the repeater in use. For example: 'Mobile to base - Call up using a repeater transmission route.'

What is the purpose of the EMSCOM manual for?

This manual is provided for the use of all services that may have occasion to

use the New Mexico Emergency Medical Services Communications (EMSCOM) System. The intended purpose of the manual is to provide a basic understanding of the capabilities and proper utilization of the State EMSCOM system. Maintenance policies are also included.

 **Efficient Higher Revenue**

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 150W Peak Output Power
- 2 MPPT Trackers, 150% DC Input Oversizing
- Max. PV Input Current 15A, Compatible with High Power Modules

 **Intelligent Simple O&M**

- IP66 Protection Degree: support outdoor installation
- Smart I-V Curve Diagnosis Function: locates PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection

 **Flexible Abundant Configuration**

- Plug & Play, EPS Switching Under 10ms
- Compatible with Lead-acid and Lithium Batteries
- Max. 6 Units Inverters Parallel
- AFCI Function (Optional): when an arc fault is detected the inverter immediately stops operation
